EXCEL PORTFOLIO BLUEPRINT

E-Commerce Sales & Profitability Dashboard

A end-to-end data analytics project specification for resume portfolios | Dataset, Formulas & Executive Insights

1. Key Executive Metrics (Dashboard Summary)

NET REVENUE	GROSS PROFIT	PROFIT MARGIN	AVG ORDER VALUE
$7,910.00	$2,333.00	29.50%	$659.17
Across 12 Orders	Total Earnings	Overall Average	Per Transaction

2. Master Transaction Dataset (`SalesData` Sheet)

Txn ID	Date	Region	Category	Units	Price	Cost	Disc %	Payment	Net Rev	Profit
TXN-1001	2026-01-05	North	Electronics	5	$120.00	$80.00	5%	Credit Card	$570.00	$170.00
TXN-1002	2026-01-12	West	Furniture	2	$350.00	$200.00	10%	PayPal	$630.00	$230.00
TXN-1003	2026-01-18	South	Clothing	12	$25.00	$10.00	0%	Credit Card	$300.00	$180.00
TXN-1004	2026-02-02	East	Electronics	8	$90.00	$60.00	15%	Debit Card	$612.00	$132.00
TXN-1005	2026-02-14	North	Furniture	4	$220.00	$150.00	5%	Credit Card	$836.00	$236.00
TXN-1006	2026-02-20	West	Clothing	15	$30.00	$12.00	10%	PayPal	$405.00	$225.00
TXN-1007	2026-03-01	South	Electronics	3	$450.00	$310.00	0%	Credit Card	$1,350.00	$420.00
TXN-1008	2026-03-10	East	Furniture	6	$180.00	$110.00	5%	Debit Card	$1,026.00	$366.00
TXN-1009	2026-03-15	North	Clothing	20	$20.00	$8.00	20%	Credit Card	$294.00	$134.00
TXN-1010	2026-03-22	West	Electronics	2	$800.00	$550.00	5%	PayPal	$1,156.00	$456.00
TXN-1011	2026-04-05	South	Furniture	3	$290.00	$180.00	10%	Credit Card	$333.00	$153.00
TXN-1012	2026-04-18	East	Clothing	10	$40.00	$18.00	0%	Debit Card	$398.00	$218.00

3. Calculated Column & Aggregation Formulas

Table Calculations (`SalesData`)

Gross Revenue (Col J):

```
=[@[Units_Sold]] * [@[Unit_Price]]
```

Net Revenue (Col K):

```
=[@[Gross_Revenue]] * (1 - [@[Discount_Pct]])
```

Total Cost (Col L):

```
=[@[Units_Sold]] * [@[Unit_Cost]]
```

Profit Margin % (Col N):

```
=[@[Profit]] / [@[Net_Revenue]]
```

KPI & Lookup Formulas

Total Regional Net Sales (SUMIFS):

```
=SUMIFS(SalesData!K:K, SalesData!C:C, "West")
```

Top Category Lookup (MAX + XLOOKUP):

```
=XLOOKUP(MAX(CatTotals), CatTotals, CatNames)
```

Dynamic Credit Card Filter (FILTER):

```
=FILTER(SalesData!A2:N13, SalesData!I2:I13="Credit Card")
```

4. Key Business Insights Derived

1. High Revenue Driver

Electronics generated $3,688.00 (~46.6% of net revenue), driven by high ticket prices despite moderate unit volume.

2. Highest Profit Margin Category

Clothing yielded an average margin of **53.1%**, making it the most cost-effective segment for promotional ad spends.

3. Top Performing Region

West Region generated the highest regional net revenue ($2,191.00) and profit ($911.00), outperforming North and South.

4. Payment Method Trends

Credit Card transactions represented 58.3% of total revenue ($4,619.00), signaling strong loyalty program potential.

5. Recommended Resume Bullet Points

How to format this project on your Resume:

- **E-Commerce Sales & Profitability Dashboard** | *Excel, Data Analysis & Financial Modeling*
- Engineered an interactive Excel dashboard analyzing $7.9K+ in multi-region sales transactions utilizing `XLOOKUP`, `SUMIFS`, dynamic array formulas, and Pivot Tables.
- Identified top-margin product categories (Clothing at 53.1% margin) and top revenue drivers (Electronics at 46.6%), delivering actionable inventory strategy recommendations.
- Automated transaction data cleaning and metric aggregation, reducing manual reporting overhead and enabling real-time executive decision-making.
